

What to expect when you visit

**CENTRE FOR
IMPLANT DENTISTRY**

We will always welcome you with a warm hello and the offer of a tea or coffee. We are sure that all your visits to us will be straightforward and worthwhile with the aim of providing you with a healthy smile.

1st Visit Initial Consultation

This is a completely free of charge visit where you can meet the team and discuss your needs and wishes. So that we can recommend some possible treatment options, we will ask you to fill out a comprehensive medical history form and ask you some questions regarding your dental health. Just remember we have seen and treated all types of dental problems so do feel free to ask questions and obtain as much information as possible.

2nd Visit Full Diagnostic Assessment

We are confident that you will have found your first visit worthwhile and wish to explore your possible treatment options. This visit involves a Full Diagnostic Assessment and normally lasts around 45 minutes.

Our implant dentist and support staff all work together to carry out the essential investigations. This is a full dental health assessment and will include clinical photos, moulds of your mouth and X rays. Once these are all gathered together our team will meet to discuss your individual case and provide a solution for your ongoing dental health in the form of a comprehensive written treatment plan. This contains all the information needed to make a clear and informed decision that is best for you. The fee for this procedure is £168. Please note that you may combine visits 1 and 2 to reduce the number of visits to the centre.

3rd Visit Treatment Plan Proposal

A visit to the centre or a follow up call, whichever is more convenient for you. We will present you with your tailored treatment proposal, discuss the details of your case and answer any queries you may have. If you are agreeable, you will sign the consent forms and arrange some further appointments so that your treatment can commence.
